

Nice To Meet You

SMART is an Erasmus+ project aimed at integrating artificial intelligence (AI) in European small and medium-sized enterprises (SMEs). Our goal is to develop an innovative training program to improve efficiency, productivity and customer experience. The initiative targets VET professionals and students, offering expertise on the practical application of AI as well as ethical and legal aspects. Through specific work packages, SMART develops a teaching manual, an e-learning platform and communication activities to disseminate the results. The ultimate goal is to foster the adoption of AI in SMEs, creating new job opportunities and stimulating European competitiveness. The expected impact includes personalization of learning, automation of processes and an overall improvement in employee safety and well-being. [Learn More](#)
